User selects the restaurant website.	375c849	User is directed to the home page.	User is directed to the home page	Pass	
User selects one of the above tabs	375c849	User is directed to the right page accordingly	User is directed to the right page accordingly	Pass	
User selects card from the Join Us pages.	e355559 32dc738	User is directed to a Personal Details page.	User is directed to a Personal Details page.	Pass	
User hovers on tab	375c849	Tab highlights	Tab highlights	Pass	Some tabs do not highlight the same
User hovers on link	375c849	Link turns from white to blue	Link turns from white to blue	Pass	
User selects links from the footer	375c849	User is taken to another webpage according to the link selected	User is taken to another webpage according to the link selected	Pass	

Tested Action	GitHub Commit ID	Expected Output	Actual Output	Pass/Fail	Notes
User selects image from Gallery page	766599f	Image enlarges to screen size and becomes carousel	Image is unable to be selected and becomes carousel	Fail	A carousel will be installed in future improvements
User selects text box to type in details on Contact Us page	5ad9e5d	Texts box highlights and is typable	Texts box highlights and is typable	Pass	
User selects check box for new offers on the Contact Us page	5ad9e5d	The checkbox highlights and shows check icon	The checkbox highlights and shows check icon	Pass	
User clicks on Send button in the Contact Us page	5ad9e5d	It highlights and shows user any information they forgot to add	It highlights and shows user any information they forgot to add	Pass	
User selects Facebook icon at footer	375c849	Is taken directly to the Facebook page of the restaurant	Is taken directly to the Facebook page of the restaurant	Pass	Would be better if the icon highlights or enlarges when hovered

Evaluations and Future Improvements

- Overall the website performs well and loads pages at a quick rate when testing.
- I've kept including the blue colour shade, making the page contain a relatable design to the actual shop. For future improvements I feel like I could have explored more on font variety and even different layouts too even though I'm content with the layout and scalability I've produced for each page.
- Another future improvement was to make more emphasis on the Web Accessibility Guidelines but adding more animations and adding a speech function, helping those with any difficulties in reading.

Evaluation and Future Improvements

- Another improvement is adding a feedback section since it is a new website which user can test and give there opinion in what they think on the website's performance.
- Adding a search button to the website is also an improvement I'd like to add since it would help a user be directed quicker to what they are interested in.
